

dear Tour de Cure, Barbara, Ian and the Hogbin Family,
A huge thank-you for your support over the past year!

As a result of your support I have been able to test potential new cancer therapies in our models of gastrointestinal cancer \Rightarrow with great success! At the moment I am writing up our results for publication. Importantly - with your support this year I was able to generate the ground work for my next projects which have just been funded by the National Health and Medical Research Council as part of a New Investigator grant to expand on my research in the gastrointestinal tract, in addition to funding from the CASS foundation to see if I can apply my findings to breast cancer. Indeed I have taken advantage of every opportunity your support has provided - and I hope that I have not only demonstrated how important young scientists are to the fight against cancer, but also how hard we work to generate exciting new findings - which is impossible without the support of people like yourselves! I will post our publication to you when it is ready - I do hope you will be as proud of the accomplishments as we are! It is with sincere gratitude that I wish you a wonderful holiday and a fabulous new year! We look forward to all of your future support!

Dr. Tracy Putoczki
